

# Alternate Power Cart “Alt-P”

**The ALT-P series power carts are built to take a standard single phase 240 Volt generator and allow you to run a three phase pump motor up to 20 hp or rating of the generator and cart. This cart is built to run one pump, bypassing the pump control station all together. Providing extended running capability after severe storms and power failures.**

- **10 hp and 20 hp versions available**
- **8” Wheels for easy travel over rough terrain**
- **Front casters and solid rear wheels for easy maneuvering**
- **Large storage compartment for cables and tools**
- **Can be setup in minutes**
- **With or without float controls**
- **Lifting eyes for easy assisted lifting**
